PIUSI

GASOLINE FILTER E25

**Flow rate
Up to
70 l/min**

**10µm
(85%)**

**Operating
pressure
max. 12 bar**

**Water
absorption**

Maximum safety for your fuel:
optimize performance with gasoline up to E25
and diesel up to B20!

GASOLINE FILTER E25

II 3G Ex h IIA T6 Gc U
-25 °C ≤ Ta ≤ +50 °C

Discover our new ATEX cartridge filter, an innovation in filtration.

Advanced technical features:

ATEX: The filter is certified with ATEX (Zone 2) compliance, ensuring its suitability for use in explosive environments while guaranteeing high safety standards and performance under various operating conditions.

Compatibility with modern fuels: The device is designed to adapt to the evolution of today's fuels. It is compatible with gasoline up to E25 and diesel up to B20, ensuring effective filtration for next-generation engines.

Advanced filtration system: The implemented technology allows precise filtration, effectively removing both impurities and water from the fuel. This ensures that only highly purified fuel reaches the engine, optimizing performance and extending engine life.

Main advantages:

- High engine protection from contaminants and water
- Improved combustion efficiency and reduced fuel consumption
- Extended engine lifespan thanks to reduced wear
- Consistent optimal vehicle performance

The cartridge filter stands out as a technologically advanced solution for those requiring high standards of quality, efficiency, and reliability in managing their vehicle. It is the optimal choice to ensure high-level performance and increased engine longevity.

Code	Description	Flow rate	Efficiency	Micron	Working pressure	Water absorption	ATEX
F26169010	(EX) GASOLINE FILTER:E25 HEAD & 2 CARTD	70 l/min	85%	10 µm	12 bar	Yes	Zone 2
F26169000	(EX) GASOLINE FILTER:E25 CARTD 12 PCS	70 l/min	85%	10 µm	12 bar	Yes	Zone 2

✱ Not for use with aviation applications. Does not detect phase separation.
